## PixeZoom

PixeZoom - is a unique pixel scaling image processing Plug-in for Photoshop. Using Pixel's unique scaling technology, PixeZoom provides smoother edges and line interpolation for every image and saves original resolution. PixeZoom uses a unique scaling algorithm and it will automatically enlarge your picture without any quality deterioration. PixeZoom uses Photoshop's scaling algorithm and enables you to scale images with the maximum quality without any image quality loss. PixeZoom allows you to convert your image in 3 different pixel sizes with a unique set of JPEG or BMP/TIFF save features. PixeZoom is compatible with Photoshop CS3 and up, and after installation, it will detect in Photoshop the current image size and the size desired to scale an image. Help police catch Susan Miller's killer Couple shot dead 'over a drug debt' in north Swindon Suspect wanted for the murder of Susan Miller was last seen at this flat, where she was shot dead. Susan Miller (pictured), a 39-year-old mother-of-five, was shot dead when she visited an address in Swindon. Published:09:24Wednesday 13 June 2016 Share this article A manhunt is underway to catch a man suspected of killing a mother-of-five in Swindon. Susan Miller, 39, was shot dead on Monday night when she visited an address in North Swindon. Two men have been arrested in connection with her death. Police are appealing for information about her killer. Neighbours claim that the victim was known as a "straight up nice lady". She is said to have lived with her partner David at a flat on Mearsons Avenue. Susan had been out for a walk in the evening with her friend Heather when she was shot in the street at around 9.30pm. A murder investigation was launched and a police cordon was set up in the area. Neighbours described Susan as a "nice" family woman and said her partner did not have an alibi. A neighbour said she saw a man enter the flat with a gun shortly after Susan left at around 7pm. Neighbour Garry Williams said: "I saw a blonde

## What's New in the?

By using automatic red-eye correction, Pixela's best technology and advanced algorithm, PixeZoom has the capacity to accurately detect and correct imperfect red-eye effect. Red-eye correction technology first detects the position of the red-eye. Then, the software restores the areas with red-eye to their original color, by subtracting areas with red-eye. This is done by multiplying the pixels in the red-eye areas by a coefficient. This results in a soft, natural look and will never alter the original skin color. As a result, the image does not look like a picture of the Red-eye Red-eye can be caused by overexposing a captured image by pointing the camera's camera towards the flash, a flash accidentally or camera was not equipped with flash, using the wrong flash settings and by the presence of cataracts or other eye diseases. The software can correct all red eyes in a picture and remove their color, with a single click. PixeZoom Description: Red-eye detection. White balance correction. Red Eye Correction. Black and white mode. Advanced panoramic and multi-angle modes. Shape keys (collections of shapes) export. Advanced brush tool. Mask and layer ability. Double click to open. You can save your PixeZoom settings to make changes at any time. Windows XP compatible. Let's show you another example: Photoshop CS3 Animated GIF (Or Screen Film) PixeZoom (With LZW Compression) PixeZoom (With LZW Compression) What's new in version 3.1 Version 3.1 is new feature of PixeZoom. LZW Compression LZW Compression is new feature of PixeZoom. It is best compression method in bitmap or graphics. It has little resource consumption and the processing speed is really high. It compresses raster data in blocks with a run length encoding using the Lempel-Ziv-Welch compression algorithm. With this method you can get better compression ratio. How to use PixeZoom You can use PixeZoom like Photoshop. It is best scaling plug-in in Photoshop. You can add new effect like the one you saw in this demo. You can use imported image like this demo.
