Welcome to the age of automation and democratization, in which a single person can make even the most complex tasks easy to carry out. With a simple tap of your phone's touch screen, your life is

about to change thanks to Document Cloud Document. A popular cloud service, Document Cloud is used by users all over the world for storing, sharing, and working on their files.

However, it's only through a simple user interface that users

can access and
manipulate them. The
good news is that
Document Cloud has
just upgraded
Document Cloud
Manager, its cloud
service browser, to
Document Cloud
Document, which is
designed for
automating your life.

How it works? With a simple user interface, you can integrate all the workflows you need into one app. For example, you can mark certain files as read or archive or merge. Even better, you can create automated workflow that helps you with

tasks such as organizing content, creating a backup, publishing to a website, attaching an image, getting comments, and sending e-mails, to name a few. Here's how it works: Within the Document Cloud Document app, you

can easily select all the files, folders, or snippets of text that you want. After tapping Select, you're prompted to decide whether you want to select the entire document, a subfolder, or a specific text. If you decide to select a specific text,

you are asked to provide a search string. This string can be anything you want, including a word, phrase, or a sentence. Selecting a phrase or phrase is a very useful feature because it allows you to combine file and text selections. Once

you've selected all the files you want, you can click Edit to get started. If you want, you can unselect or de-select any file, folder, or text. When all the necessary files are ready, tap Merge to merge everything into one PDF. Now comes the real magic, as

Document Cloud
Document will
automatically publish
your merged PDF to
the Document Cloud,
which is the cloud
version of Document
Cloud. Since the
integration is one-
way, all the files and
folders selected will
be published to the

cloud service. When all the files are done, you can view your merged PDF, share it via e-mail, mobile, social media, and more. You can also edit the merged PDF, just as you would for any other file, and you
